Broome Style Restrainers

This is perhaps the most effective style available for three basic reasons;

1. Ease of use and access to the rodent.
2. Prevention of the animal's ability to turn.
3. Safety for the animal handler.

Flat Bottom Restrainers

These convenient restrainers have been a research standard for over forty years. The adjustable tail stock can be inserted into any one of four positions. Apertures in the top and bottom provide easy access for injections or sampling. The pocket and holes in the front make it easy to anesthetize or feed the animal. Refer to page 23.

Rodent Injection Cone

This device is relatively new on the research scene. It is extremely useful for large quantity sampling where high speed and efficiency are required. It is completely transparent, durable, and easy to clean, suction cup feet offer a secure work device. Refer to page 23.

Surgery Boards

Plas ■ Labs surgery boards are formed of one piece high-temp Noryl™ for durability and ease of cleaning. Five adjustable Nylon cords are included. (Refer also to Page 19)

L.	561-RC	Injection Cone	5.75" long x 5" high x 4" opening	Mice: 15 to 30 g Rats: 500 to 600 g

All rodent restrainers are manufactured from clear materials to provide complete visual awareness of the state of your animal. We offer two styles of restrainers in four convenient sizes.

**A special Broome Style unit for obesity studies, The Zucker Unit, is also offered.
Catalog # 555-BSRR (Not illustrated).**

Insertion Sequence

To place the animal in the Broome Style Restrainer, loosen and remove the nose piece and grasp the animal by the tail. Slide the animal's tail along the longer open groove until the animal is completely in the cylinder. Slide the nose piece into the short groove on the opposite side of the restrainer and place it up to the nose of the animal to ensure a snug fit.

This restrainer is perfect for injections or blood sampling.

Also, refer to our new illuminated rodent cone, part number 562-IRC, on page 25

550-Series Insertion Sequence

Bowman Style Rodent Restrainer

The PLAS ■ LABS 530-POR, Bowman Style Rodent Restrainer has been re-engineered and refined to accommodate larger sized animals up to 750 grams. The positions of the stainless steel rods around the rodent provide easy access for many types of research applications, especially obesity studies.

The rodent can quickly be inserted into the restrainer by removing several stainless steel upper rods, or through an access port hole in the rear upright. The access port hole features a polycarbonate locking door to prevent escape.

The front “guillotine” door can be adjusted and locked by using any one (1) of three (3) adjustment positions. The door has a stainless steel “spring loaded” lock. Suction cup feet on the white plastic base secure the device during use.

530-POR

Product Specifications

- Weight Range: 250 up to 750 grams.
- Maximum length of the rodent compartment is 9" (228 mm).
- Eighteen (18) stainless steel rods are adjustable up to 3.5" ø (89 mm)
- Rear access port opening is 2" ø (50.8 mm). The polycarbonate locking door is attached by a “nylock” fastener to prevent future operational loss.
- Overall height is 11" (279 mm).
- Base size is 10" x 12" (254 mm x 305 mm).
- Basic unit is constructed of .500" (12.7 mm) jeweled acrylic.
- Suction cup feet included for stability.

Close-up of rear locking door to prevent escape.

Door in the upper position locks the stainless rods in place.
